MUZAMIL MUGHAL

SENIOR iOS DEVELOPER

Lahore, Pakistan | +92 334 4211800 | muzamilmughal81@gmail.com | linkedin.com/in/muzamil-mughal-14846273

SUMMARY

Senior iOS Developer with 8+ years shipping production Swift/SwiftUI applications, specializing in on-device AI and computer vision. Designed and own the iOS component of PackageX's Vision SDK — an on-device OCR/computer vision engine live across 40+ countries — cutting document processing time from 7+ seconds to ~200ms while lifting extraction accuracy to ~95%. Experienced across the full app lifecycle: architecture (MVVM, VIPER, Clean Architecture), performance tuning, App Store release management, and mentoring junior engineers. Delivered 28+ iOS applications across logistics, retail, and consumer domains.

CORE SKILLS

Languages & Core iOS: Swift (Expert), Objective-C (legacy maintenance & migration), iOS SDK, UIKit, SwiftUI, Foundation, Auto Layout

Apple & AI Frameworks: Swift Concurrency (async/await), Core ML, Vision, ARKit, AVFoundation, Core Location / MapKit, StoreKit, UserNotifications

Architecture & Patterns: MVVM, VIPER, Clean Architecture, Modular Architecture, Dependency Injection, Coordinator Pattern, Protocol-Oriented Programming, SOLID

Networking & Data: URLSession, REST & GraphQL APIs, Codable, WebSockets, Alamofire, Realm, SQLite, Keychain, FileManager

Performance & Testing: Instruments, Memory Management / ARC, Leak Detection, XCTest, XCUITest, Unit & UI Testing

CI/CD & Release: GitHub Actions, App Store Connect, TestFlight, Automated Builds & Deployment, Code Signing & Provisioning

Security & Cloud: SSL Pinning, Biometrics (Face ID / Touch ID), Encryption, Firebase (Analytics, Crashlytics, Remote Config), AWS

AI / Computer Vision: On-device OCR, Core ML & Vision-based scanning, AI Model Integration (OpenAI APIs, Apple Intelligence)

Leadership & Process: Technical Leadership, Team Mentoring, Architecture & Solution Design, Agile (Sprint Planning, Code Reviews), Stakeholder Communication, Interviewing & Hiring

EXPERIENCE

PackageX — **Oct 2021 – Present**

Senior iOS Developer · Lahore, Pakistan

- Designed and built the iOS component of PackageX's Vision SDK, an on-device computer vision and OCR engine now deployed across 40+ countries, cutting document processing time from 7+ seconds to roughly 200ms and improving extraction accuracy to ~95%.
- Migrated all in-house and client-facing applications onto the new SDK, replacing manual, error-prone data entry and becoming the sole iOS owner of the platform's core scanning capability.
- Mentored and onboarded 2-3 iOS engineers, introducing debugging, performance-tuning, and code-review practices that shortened new-hire ramp-up time.
- Led requirement analysis and technical solutioning with cross-functional and client stakeholders, consistently hitting tight App Store release deadlines.
- Owned complex debugging, performance tuning, and end-to-end testing across the app portfolio to maintain stability at production scale.

SixLogics / SportCC — **Mar 2018 – Oct 2021**

Senior iOS Developer

- Delivered 27+ iOS applications in Swift across multiple concurrent projects, with 8 published to the App Store, spanning sports networking, live scoring, and payments — partnering directly with clients to translate requirements into technical solutions.
- Led and managed a team, including training and mentoring interns as they ramped up on iOS development.
- Betway Scores: sole iOS developer for 2 years — built the entire scoring, news, and push-notification infrastructure from the ground up for a live sports scores and stats app.
- Player Match: main developer on a football networking platform — built multi-stage, role-specific login, a social feed with video posts, in-app chat, and the scoring module.
- Fan Challenge and Sport Score App: primary developer on both, owning each app end-to-end from architecture through App Store release.
- Park4U: sole developer of a parking app integrating in-app payments with a polished, custom UI.

Ecom Planners **Nov 2017 – Feb 2018**

iOS Developer

- Built and maintained iPad applications using UIKit and Objective-C, ensuring stability and consistent performance.
- Improved app reliability through focused debugging and performance-tuning cycles.
- Coordinated build delivery against tight deadlines while maintaining code quality standards.

OneByte LLC **Jul 2017 – Sep 2017**

iOS Intern

- Contributed to application design and implementation using UIKit, with back-end development in Objective-C.
- Built foundational experience across the full software development lifecycle and iOS app architecture.

EDUCATION

Government College University — BS, Computer Science 2013 – 2017
